

• OFFICIAL COMPENSATION PLAN

How participants earn on Mente Protocol.

Every rate, cap and payout rule below is read directly from `MenteProtocol.sol` — the smart contract that holds and moves funds. Nothing here is a marketing estimate; it is what the contract enforces on-chain.

Staking mechanics

01

Every income stream below is funded by stakes moving through these same rules — the deposit size, the fee, and the cap that governs how much any one stake can ultimately pay out.

STAKE RANGE	STAKE INCREMENT	ECOSYSTEM FEE	EARNING CAP
\$10 – \$1,000	\$10 steps	10%	2× → 3×

Every deposit is reduced by a 10% ecosystem fee; 80% of what remains determines your token allocation. Your earning cap starts at 2× your total stake and rises to 3× automatically the moment your first direct referral becomes active.

Six ways to earn

02

Every dollar paid to a participant falls into one of six income types. Four count against your earning cap; two do not.

01	Self ROI 1.74% of your mint value per day — equal to 1.2528% of your gross stake per day. Accrues linearly until your stake has returned 2× its value; you claim it yourself in whole 24-hour periods. COUNTS TOWARD CAPSELF-CLAIMED
02	Direct referral 5% of the gross amount a direct referral stakes, paid to you instantly, one level deep. Your first active direct referral also upgrades your own cap from 2× to 3×. COUNTS TOWARD CAP
03	Generation 30% of a downline member's ROI claim, in total, spread across 20 levels of depth (table below). Paid the moment they claim. Requires you to be active with ≥\$50 staked, and a minimum number of "qualified" directs to unlock each level. COUNTS TOWARD CAP
04	DAO partner pool 5% of every stake on the network — from any participant — funds a shared pool. Distributed to all active stakers on a regular cycle, weighted by stake size. NOT CAPPED
05	Rank reward A one-time bonus the first time you reach ranks 2 through 8 (table below). Qualification criteria for each rank are set by the platform and communicated separately from this document. NOT CAPPED

06

Rank incentive

A discretionary bonus the platform may credit on top of the above, at its judgment.

COUNTS TOWARD CAP

Generation depth, level by level

03

The 30% generation pool is weighted toward the levels closest to you, then tapers across the full 20-level downline.

DEPTH	SHARE OF THE ROI CLAIM
Level 1 — your direct's direct	10%
Level 2	5%
Level 3	3%
Level 4	2%
Levels 5 – 6 (each)	1.5%
Levels 7 – 10 (each)	1%
Levels 11 – 20 (each)	0.3%
Total across 20 levels	30%

Unlocking depth: every 2 "qualified" directs (referrals who have personally staked at least \$50) unlock one additional level — 1 qualified direct unlocks levels 1–2, 10 qualified directs unlock the full 20 levels. You must also be active with at least \$50 staked yourself.

Rank rewards

04

One-time bonuses, paid in full and not limited by your earning cap, the first time you reach each rank.

RANK	ONE - TIME BONUS
Rank 2	\$500
Rank 3	\$750
Rank 4	\$1,750
Rank 5	\$5,750
Rank 6	\$11,250
Rank 7	\$25,000
Rank 8	\$80,000

Qualification criteria for each rank (team size, volume, or similar) are set by the platform and will be communicated separately — the amounts above are fixed on-chain; the path to reach them is a program decision, not a contract one.

Selling & withdrawing

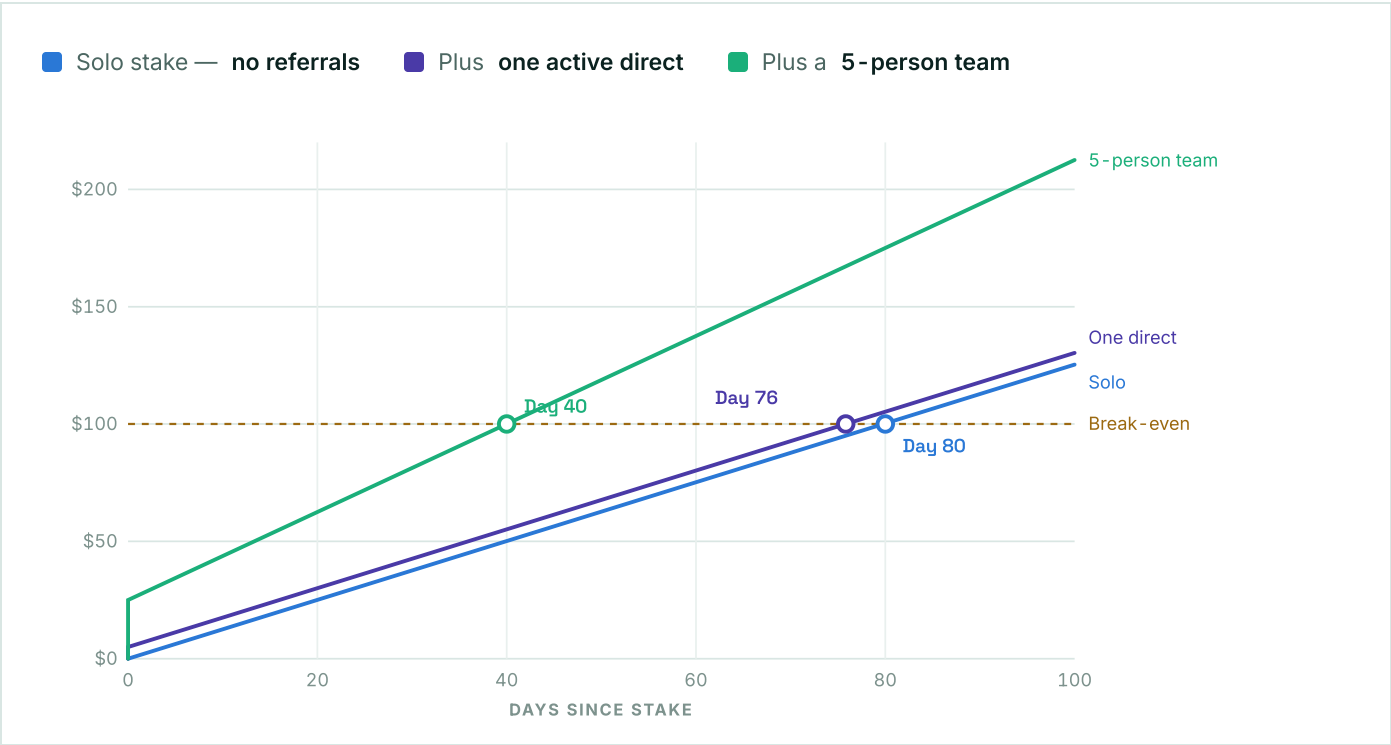

05

Two separate exits: selling your token balance back into the pool, and withdrawing your accumulated USDT earnings.

Selling tokens		Withdrawing earnings	
Payout rate	85% of USDT value	Withdrawal fee	5%
Retained by pool	15%	Minimum	\$10
Daily limit, per user	\$3,000	Maximum, per withdrawal	\$3,000
Network-wide rolling cap	30% of pool / 24h	Custody	Paid to your wallet

The path to profitability

Three ways the same \$100 stake plays out, modeled directly from the contract’s own rate: 1.2528% of gross stake per day in self-ROI, plus whatever referral and generation income is layered on top. The dashed line marks break-even — the day your cumulative income equals your original \$100.

SOLO STAKE	+ ONE ACTIVE DIRECT	+ 5-PERSON TEAM
80 days	76 days	40 days
Pure 1.2528%/day self-ROI. No referral activity assumed.	\$5 instant direct commission, same \$100 stake.	\$25 instant commissions + level-1 generation as the team claims.

Self-ROI is close to a fixed function of the contract once you claim consistently. Referral and generation income depend on real people staking and claiming under you — faster, but not guaranteed. See “Important notes” below.

Read before participating. This document describes protocol mechanics exactly as implemented in the smart contract — it is not a guarantee of return.

- Income depends on network activity (staking, selling and referral growth) and is not promised or fixed.
- Mente Protocol is non-custodial — your wallet signs every transaction; the platform never holds your private keys.
- The contract is upgradeable behind an administrator key. Participants should verify the administrator address before relying on these terms.
- This is not financial advice. Review the risks independently before staking any amount.

All rates, fees and caps in this document are sourced from `MenteProtocol.sol` as of the date above. The platform reserves the right to adjust future program terms (including rank qualification criteria); any such change will be communicated separately and will not alter rules already settled on-chain.
